Figure 5B illustrates more possible pixel configurations.

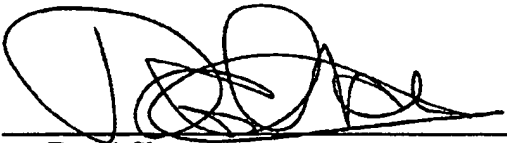

Please amend the paragraph beginning on Page 20, line 22.

For example, ~~Figure 5 illustrates~~ Figures 5A and 5B illustrate some possible pixel configurations. Some pixels are found in X,Y pairs such as pairs 501 or as single pixels 502. The pixels may also be in single rows in X 503 or Y 504. There may be an X pair with diagonal Y 508 or Y pair with diagonal X 506. There could be a diagonal 507 or 2 pixels separated 505. There could also be an X pair with separated Y 509, a Y pair with separated X 510, or more than two pixels separated 511. Some examples of fragment pixel plane equation configurations, and their occurrence as a percentage of total fragments in a simulation of average 25 pixel triangles in an 8K triangle torus follows.

Applicant declares that no new matter has been added in these amendments and hereby requests that they be entered into the application.

Respectfully submitted,
